Ingredients for Pets

Introduction to Kerry

Kerry is a world leading Taste & Nutrition company, with an extensive portfolio that includes 15,000 ingredients, technologies and systems.

With a strong presence in the United States, we take great pride in our record of food safety, quality, and sustainability at our 40 manufacturing plants.

At our North American Technology & Innovation Center (Beloit, WI), our broad team of nutritionists, sensory scientists, and culinary experts deliver innovative pet food and treats solutions.

We understand current and emerging pet nutrition trends and use our expertise to develop winning solutions for pet food manufacturers.

- Meat Analogs and Textured Proteins

Natural Flavors: Smokes, Yeast Extracts, Cheese and Yogurt Powders

Sub Category	Range
Smoke Portfolio	Functional Smokes Smoke Flavors Smoke Powders Smoke Oils
Natural Flavors	Seafood & Meat Flavors Vegetable & Fruit Flavors Cheese Flavors
Others	Yeast Extracts Cheese Powders Yogurt Powders

Kerry is the world leader in smoke expertise with cutting-edge technologies, and processing capabilities which are second to none. Along with our extensive library of flavors we have the expertise to customize flavors, delivering a truly unique offering for your pet food products.

Broths, Stocks and Bouillons

Sub Category	Range
Broths	Meat Fish & Seafood Vegetable
Wet Stocks and Reductions	Meat Fish & Seafood Vegetable
Dry Stocks and Bouillons	Meat Fish & Seafood Vegetable

Through the use of traditional cooking techniques we offer a vast portfolio of authentic broths, stocks and bouillons. These culinary offerings deliver on the indulgence and familiarity pet owners are increasingly seeking.

Clean Label Solutions and Specialty Enzymes

Sub Category	Range
Clean Label Solutions	Our clean label, fermentation-derived, fresh keeping ingredients protect against spoilage organisms, yeasts and molds, and prevent the growth of pathogens. These are appropriate for use in semi-moist, refrigerated and dry products.
Specialty Enzymes	Lactase Protease Amylase

We have an intrinsic understanding of ingredient functionality, unmatched processing capabilities and clean label solutions for freshness keeping.

Emulsifiers

Sub Category	Range
Emulsifiers	Myvatex™ for dry and semi moist pet food and treats applications

Our non-soy based Myvatex™ offers significant throughput gains, reduced breakage, and shortened drying times. Lower water activity can be achieved, resulting in longer shelf life.

Puffed Grains and Extruded Shapes

Sub Category	Range
Puffed Grains	Traditional Ancient
Extruded Shapes	Flakes Pillows Clusters Puffs Crisps

Our puffed grains are a great tasting source of protein and fiber, delivering the benefits consumers associate with these superfoods. Our range of customized extruded products provide the capability to improve taste and texture, while delivering on the varied nutritional requirements of pets.

Proteins and Hydrolyzed Proteins

Sub Category	Range
Intact Plant	Potato Soy
Hydrolyzed Plant	Pea Rice Soy Wheat
Hydrolyzed Animal	Whey Casein

Our recent innovations include a unique blend of quality plant based proteins combined with our TasteSense™ technology to ensure great taste. Our proteins blends are natural, non-GMO and free from most allergens.

Gum Acacia and Carrageenan

Sub Category	Range
Texture Systems	Our acacia gum-based product, EmulGold™ Fibre, alongside thickening properties, is used to increase the sensation of fullness, without negatively influencing palatability or stool consistency.
Texture Systems	High quality, semi-refined carrageenan derived from alkali treated cottonil, containing predominantly kappa carrageenan.
Texture Systems	Complete Stabilizer Systems

Our range of gums and carrageenans are designed to improve processing and enhance appetite appeal and sensory qualities of pet food and treats.

Meat Analogs and Textured Proteins

Sub Category	Range
Soy Based, Wheat Based and Blends	Mince Shreds Chunks

Our textured proteins are natural, nutritious and cost effective. In addition to the protein base, we offer complete solutions including binding technology, seasonings, taste and coating systems, offering versatility across all pet applications.
